

Blinder Link - Saddle Mount

CHIP ON BOARD LED'S:

Using advanced COB LED technology mean the Link produces a clear, bright and consistent beam of light.

SUPER BRIGHT:

Producing a powerful 100 Lumens means the Link is bright enough for use in any riding conditions.

100% WATERPROOF:

With an IP67 rating, this light can be summered in 1 meter of water and still come out shining.

LIGHTWEIGHT:

Weighing just 40 grams, this is lightweight in all the right ways.

SADDLE MOUNT:

Universal saddle rail mount, easy to fit and secure without taking up vital seat-post space.

CLIP WEARABLE:

When not on its designated mount, the Link has a clip that allows a rider to attach it to their bag, their belt or anywhere they wish to have additional visibility.

CHARGE INDICATOR:

Convenient LED glows green whilst the light is charging and turns off when the light has achieved full charge capacity.

8 MODES:

The Link has eight modes to choose from, including: 50 Hr runtime, so whether you are looking for the best battery life or the most eye-catching light pattern, the link has a multitude of options to pick from.

USB C RECHARGEABLE:

No need to worry about batteries with Link; simply recharge by plugging into any USB C port using the supplied cable.

LOW BATTERY INDICATOR:

No need to guess when you're light need to be recharged with a convenient LED that lights up red when your light dips below 10% remaining charge.

Often the best location for a rear light visibility is just below the saddle of your bike, as such the new Blinder Link has the ability to mount just below the saddle keeping the seat post clear of clutter and the light at the optimum position for visibility to other road users.
